

[Source Maps Generator](#)

The screenshot shows a web browser's developer tools interface. The 'Sources' panel is active, displaying a file tree on the left with 'component.js' selected. The main editor shows the following JavaScript code:

```
1 export default function () {  
2   const element = document.createElement('h1');  
3  
4   element.className = 'fa fa-hand-spock-o fa-1g';  
5   element.innerHTML = 'Hello world';  
6   element.onclick = () => {  
7     import('./lazy').then((lazy) => {  
8       element.textContent = lazy.default;  
9     }).catch((err) => {  
10      console.error(err);  
11    });  
12  };  
13
```

The status bar at the bottom of the editor indicates the cursor is at 'Line 1, Column 1'. Below the editor, the 'Console' panel is visible but empty.
